The Illiac IV: The First Supercomputer R. Michael Hord

The Illiac IV was the first large scale array computer. As the fore runner of today's advanced computers, it brought whole classes of scientific computations into the realm of practicality. Conceived initially as a grand experiment in computer science, the revolutionary architecture incorporated both a high level of parallelism and pipe lining. After a difficult gestation, the Illiac IV became operational in November 1975. It has for a decade been a substantial driving force behind the develooment of computer technology. Today the Illiac IV continues to service large-scale scientific aoolication areas includ ing computational fluid dynamics, seismic stress wave propagation model ing, climate simulation, digital image processing, astrophysics, numerical analysis, spectroscopy and other diverse areas. This volume brings together previously published material, adapted in an effort to provide the reader with a perspective on the strengths and weaknesses of the Illiac IV and the impact this unique computa tional resource has had on the development of technology. The history and current status of the Illiac system, the design and architecture of the hardware, the programming languages, and a considerable sampling of applications are all covered at some length. A final section is devoted to commentary.

From reader reviews:

Carrie Wakefield:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each book has different aim or perhaps goal; it means that reserve has different type. Some people experience enjoy to spend their the perfect time to read a book. They are reading whatever they get because their hobby is actually reading a book. How about the person who don't like reading a book? Sometime, particular person feel need book when they found difficult problem or maybe exercise. Well, probably you will require this The Illiac IV: The First Supercomputer.

Harry Greene:

What do you about book? It is not important with you? Or just adding material when you really need something to explain what the ones you have problem? How about your free time? Or are you busy man? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They must answer that question simply because just their can do in which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on kindergarten until university need this kind of The Illiac IV: The First Supercomputer to read.

Norma Wilson:

Playing with family inside a park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try factor that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love The Illiac IV: The First Supercomputer, you are able to enjoy both. It is great combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout men. What? Still don't get it, oh come on its referred to as reading friends.

Tom Harris:

Many people spending their moment by playing outside together with friends, fun activity together with family or just watching TV the whole day. You can have new activity to shell out your whole day by reading through a book. Ugh, do you consider reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Touch screen phone. Like The Illiac IV: The First Supercomputer which is getting the e-book version. So , try out this book? Let's observe.
