Terence Parr

## Language Implementation Patterns: Create Your Own Domain-Specific and General Programming Languages (Pragmatic Programmers) Terence Parr

Learn to build configuration file readers, data readers, model-driven code generators, source-to-source translators, source analyzers, and interpreters. You don't need a background in computer science--ANTLR creator Terence Parr demystifies language implementation by breaking it down into the most common design patterns. Pattern by pattern, you'll learn the key skills you need to implement your own computer languages.

Knowing how to create domain-specific languages (DSLs) can give you a huge productivity boost. Instead of writing code in a general-purpose programming language, you can first build a custom language tailored to make you efficient in a particular domain.

The key is understanding the common patterns found across language implementations. *Language Design Patterns* identifies and condenses the most common design patterns, providing sample implementations of each.

The pattern implementations use Java, but the patterns themselves are completely general. Some of the implementations use the well-known ANTLR parser generator, so readers will find this book an excellent source of ANTLR examples as well. But this book will benefit anyone interested in implementing languages, regardless of their tool of choice. Other language implementation books focus on compilers, which you rarely need in your daily life. Instead, *Language Design Patterns* shows you patterns you can use for all kinds of language applications.

You'll learn to create configuration file readers, data readers, model-driven code generators, source-to-source translators, source analyzers, and interpreters. Each chapter groups related design patterns and, in each pattern, you'll get hands-on experience by building a complete sample implementation. By the time you finish the book, you'll know how to solve most common language implementation problems.

### **From reader reviews:**

#### **Maxine Elam:**

In this 21st hundred years, people become competitive in every way. By being competitive right now, people have do something to make them survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yes, by reading a publication your ability to survive boost then having chance to stay than other is high. For you who want to start reading a book, we give you this Language Implementation Patterns: Create Your Own Domain-Specific and General Programming Languages (Pragmatic Programmers) book as starter and daily reading book. Why, because this book is usually more than just a book.

#### **Alejandra Dunlap:**

Information is provisions for people to get better life, information currently can get by anyone from everywhere. The information can be a knowledge or any news even an issue. What people must be consider any time those information which is within the former life are challenging to be find than now could be taking seriously which one works to believe or which one often the resource are convinced. If you obtain the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Language Implementation Patterns: Create Your Own Domain-Specific and General Programming Languages (Pragmatic Programmers) as the daily resource information.

#### **Contessa Watkins:**

A lot of people always spent their own free time to vacation as well as go to the outside with them friends and family or their friend. Were you aware? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you need to try to find a new activity this is look different you can read a book. It is really fun for you. If you enjoy the book you read you can spent 24 hours a day to reading a e-book. The book Language Implementation Patterns: Create Your Own Domain-Specific and General Programming Languages (Pragmatic Programmers) it is quite good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. Should you did not have enough space bringing this book you can buy typically the e-book. You can m0ore quickly to read this book through your smart phone. The price is not to fund but this book features high quality.

#### **Cheryl Cooley:**

Reading a book for being new life style in this calendar year; every people loves to examine a book. When you go through a book you can get a lots of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, such us novel,

comics, along with soon. The Language Implementation Patterns: Create Your Own Domain-Specific and General Programming Languages (Pragmatic Programmers) offer you a new experience in looking at a book.
