The Political Economy of Natural Resources and Development: From neoliberalism to resource nationalism (Routledge Studies in Development Economics)

The Political Economy of Natural Resources and Development: From neoliberalism to resource nationalism (Routledge Studies in Development Economics)

The Political Economy of Resources and Development offers a unique and multidisciplinary perspective on how the commodity boom of the mid-2000s reshaped the model of development throughout Latin America and elsewhere in the developing world. Governments increased taxes and royalties on the resource sector, the nationalization of foreign firms returned to the mainstream economic policy agenda, and public spending on social and developmental goals surged. These trends, often described as resource nationalism, have developed into a strategy for economic development, generated a re-imagining of the state and its institutional possibilities, and created a new but very significant political risk for extractive enterprises.

However, these innovations, which constitute the most dramatic change in development policy in Latin America since the advent of neoliberalism, have so far received little attention from either academic or policy-oriented publications. This book explores the reasons behind these policies, and their effects on states, firms, and development trajectories. This text brings together renowned thematic experts to examine the political-economic causes of resource nationalism, as well as its manifestation in six Latin American countries. The causal variables considered by the contributors to this collection include a range of political-economic determinants of policy including commodity prices; the influence of ideology and national politics; ideas about industrial policy; relations between host governments and investors; and how countries respond to opportunities provided by regional initiatives and the new geography of the global economy.

This volume is essential reading in development economics, political economy, and Latin American studies, as well as for those who want to understand what economic development means after neoliberalism.

Judy Sigmund:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just small students that has reading's soul or real their leisure activity. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for yourself. As we

know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this *The Political Economy of Natural Resources and Development: From neoliberalism to resource nationalism* (Routledge Studies in Development Economics) can make you feel more interested to read.
