Electron capture negative ion mass spectra of environmental contaminants and related compounds

Elizabeth A Stemmler

This book contains the ECNI mass spectra of 361 compounds selected to include the major classes of environmental contaminants, such as those found on the U.S. Environmental Protection Agency's priority pollutant list. Compound classes of environmental importance include halogenated benzenes and phenols, nitrobenzenes and the related dinitro herbicides, polycyclic aromatic hydrocarbons, DDT derivatives, hexachloro-cyclopentadiene pesticides, halogenated biphenyls, dioxins, and dibenzofurans.

The spectra, measured with the ion source at 100 oC and 250 oC, are reported graphically. In addition, compound name, Chemical Abstracts registry number, molecular weight, and structure are given. This collection of reference spectra will be of use to environmental scientists and to analytical chemists concerned with the sensitive detection and identification of synthetic chemicals in a wide variety of matrices.

From reader reviews:

Jeremiah Burroughs:

Information is provisions for folks to get better life, information presently can get by anyone in everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is from the former life are challenging to be find than now's taking seriously which one is appropriate to believe or which one often the resource are convinced. If you get the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Electron capture negative ion mass spectra of environmental contaminants and related compounds as your daily resource information.

Brenda Taylor:

Don't be worry should you be afraid that this book will probably filled the space in your house, you may have it in e-book way, more simple and reachable. This Electron capture negative ion mass spectra of environmental contaminants and related compounds can give you a lot of pals because by you considering this one book you have thing that they don't and make you more like an interesting person. This specific book can be one of one step for you to get success. This book offer you information that probably your friend doesn't recognize, by knowing more than additional make you to be great folks. So , why hesitate? We need to have Electron capture negative ion mass spectra of environmental contaminants and related compounds.

Linda Amato:

Do you like reading a guide? Confuse to looking for your selected book? Or your book ended up being rare? Why so many concern for the book? But any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but also novel and Electron capture negative ion mass spectra of environmental contaminants and related compounds or maybe others sources were given knowledge for you. After you know how the good a book, you feel would like to read more and more. Science guide was created for teacher as well as students especially. Those ebooks are helping them to put their knowledge. In other case, beside science e-book, any other book likes Electron capture negative ion mass spectra of environmental contaminants and related compounds to make your spare time much more colorful. Many types of book like this one.

Michael Thompson:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is composed or printed or descriptive from each source in which filled update of news. With this modern era like at this point, many ways to get information are available for you. From media social like newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Electron capture negative ion mass spectra of environmental contaminants and related

compounds when you necessary it?
