Biomembrane Structure and Function (Topics in Molecular & Structural Biology)

Biomembrane Structure and Function (Topics in Molecular & Structural Biology)

This collection of seven articles describes some recent physical techniques used for examining the structure and function of biomembranes and related model systems. Among the techniques discussed are calorimetry, X-ray spectroscopy, electron microscopy, Raman and IR-spectroscopy, and laser techniques. The results can be applied to monolayers and bilayers and can be used to develop models of complete biomembranes.
