**Laparoscopic Techniques in Uro-Oncology** Bertrand Guillonneau, Inderbir S. Gill, Guenter Janetschek, Ingolf A. Türk

This utterly comprehensive work covers all of the techniques involved in uro-oncology. These techniques are widely accepted, well established, safe, standardized, reproducible, and teachable. The aim is not to divide oncology into two worlds (open surgery versus laparoscopy), but to enlarge the technical proposals, with the same common goal. The book contains black and white drawings only as these are generally more precise and give a clearer understanding. It will be essential reading for all urologists interested in laparoscopy as well as urologists in training (residents) or doing a fellowship in Oncology or Minimally Invasive Surgery.
