**Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping** Nezih Ergin Özkucur

The Simultaneous Localization and Mapping (SLAM) problem is one of the most challenging problems in robot navigation. The problem addresses autonomously exploring and mapping an unknown environment without prior knowledge (of features). The robot should generate the map of the environment and estimate its pose with respect to the map. An extension of this problem to the distributed multi-robot platform is a popular research topic for its challenges and commitments. Multiple cooperative robots exploring an area would decrease exploration time and increase the accuracy. This work introduces the application of two successful SLAM solution techniques to the multi-robot domain using visual sensors and non-unique landmarks. There are two contributions to the literature: Evolutionary Strategies (ES) is used to calibrate the parameters of the Extended Kalman Filter-SLAM (EKF-SLAM) method with supervised data, and a novel map merging method with uncertainty propagation is introduced for the Fast-SLAM algorithm. The developed algorithms are tested in both simulated and real robot experiments and the improvements and applicability of the developed methods are shown with the results.

### **From reader reviews:**

#### **Linda Pillar:**

As people who live in often the modest era should be update about what going on or information even knowledge to make these individuals keep up with the era and that is always change and progress. Some of you maybe will probably update themselves by reading books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what one you should start with. This Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping is our recommendation to help you keep up with the world. Why, since this book serves what you want and want in this era.

#### **Roxanne Pineda:**

The feeling that you get from Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping will be the more deep you rooting the information that hide inside the words the more you get considering reading it. It doesn't mean that this book is hard to be aware of but Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping giving you joy feeling of reading. The article author conveys their point in selected way that can be understood simply by anyone who read the item because the author of this e-book is well-known enough. This specific book also makes your own personal vocabulary increase well. Making it easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this specific Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping instantly.

#### **Johnny Hoffman:**

This book untitled Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping to be one of several books this best seller in this year, here is because when you read this publication you can get a lot of benefit into it. You will easily to buy this kind of book in the book retail store or you can order it through online. The publisher on this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Mobile phone. So there is no reason to you to past this book from your list.

#### **Patricia Ramirez:**

Your reading 6th sense will not betray you, why because this Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping e-book written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written throughout good manner for you, leaking every ideas and writing skill only for eliminate your own hunger then you still question Multi-Agent Visual-SLAM Algorithms on Autonomous Robots: Multi-Robot Mapping as good book not just by the cover but also through the content. This is one reserve that can break don't assess book by its handle, so do you still needing yet another sixth sense to pick this specific!?! Oh come on your examining sixth sense already told you so why you have to listening to one more sixth sense.
