Learning to play a variety of scales makes you a better musician. It teaches your fingers where to find and how to handle the different positions you might encounter when playing pieces of music; it trains your musical ear by helping you to learn to recognise intervals and how they relate to finger positioning; and ultimately it trains your musical brain how to recognise different musical colours and eventually create them on the fly.

This book includes over 500 fingerboard diagrams covering 34 different scales and modes in all keys and as such is the ultimate reference text for the ukulele in ADF#B tuning. Images include full fingerboard diagrams up to the position 17 semitones above the nut (which allow you to see how the scales behave around the octave) and also for each scale type, a selection of movable 'box' patterns to help you play the scale in different positions.
