## Eating the Sun: How Plants Power the Planet Oliver Morton

A story of a world in crisis and the importance of plants, the history of the earth, and the feuds and fantasies of warring scientists—this is not your fourth-grade science class's take on photosynthesis.

From acclaimed science journalist Oliver Morton comes this fascinating, lively, profound look at photosynthesis, nature's greatest miracle. Wherever there is greenery, photosynthesis is working to make oxygen, release energy, and create living matter from the raw material of sunlight, water, and carbon dioxide. Without photosynthesis, there would be an empty world, an empty sky, and a sun that does nothing more than warm the rocks and reflect off the sea. With photosynthesis, we have a living world with three billion years of sunlight-fed history to relish.

*Eating the Sun* is a bottom-up account of our planet, a celebration of how the smallest things, enzymes and pigments, influence the largest things—the oceans, the rainforests, and the fossil fuel economy. From the physics, chemistry, and cellular biology that make photosynthesis possible, to the quirky and competitive scientists who first discovered the beautifully honed mechanisms of photosynthesis, to the modern energy crisis we face today, Oliver Morton offers a complete biography of the earth through the lens of this mundane and most important of processes.

More than this, *Eating the Sun* is a call to arms. Only by understanding photosynthesis and the flows of energy it causes can we hope to understand the depth and subtlety of the current crisis in the planet's climate. What's more, nature's greatest energy technology may yet inspire the breakthroughs we need to flourish without such climatic chaos in the century to come.

Entertaining, thought-provoking, and deeply illuminating, *Eating the Sun* reveals that photosynthesis is not only the key to humanity's history; it is also vital to confronting and understanding contemporary realities like climate change and the global food shortage. This book will give you a new and perhaps troubling way of seeing the world, but it also explains how we can change our situation—for the better or the worse.

### **From reader reviews:**

#### **Thomas Llanos:**

Book is to be different per grade. Book for children right up until adult are different content. As it is known to us that book is very important usually. The book Eating the Sun: How Plants Power the Planet had been making you to know about other know-how and of course you can take more information. It is very advantages for you. The reserve Eating the Sun: How Plants Power the Planet is not only giving you more new information but also being your friend when you experience bored. You can spend your own spend time to read your guide. Try to make relationship while using book Eating the Sun: How Plants Power the Planet. You never truly feel lose out for everything should you read some books.

#### **Christopher Patterson:**

The book untitled Eating the Sun: How Plants Power the Planet contain a lot of information on this. The writer explains her idea with easy means. The language is very simple to implement all the people, so do definitely not worry, you can easy to read that. The book was published by famous author. The author provides you in the new era of literary works. You can read this book because you can please read on your smart phone, or program, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site as well as order it. Have a nice read.

#### **Merry Springs:**

Beside this kind of Eating the Sun: How Plants Power the Planet in your phone, it could possibly give you a way to get more close to the new knowledge or info. The information and the knowledge you are going to got here is fresh from the oven so don't become worry if you feel like an older people live in narrow village. It is good thing to have Eating the Sun: How Plants Power the Planet because this book offers for your requirements readable information. Do you at times have book but you would not get what it's interesting features of. Oh come on, that won't happen if you have this in the hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. Use you still want to miss this? Find this book and also read it from today!

#### **Cara Shaver:**

Guide is one of source of information. We can add our understanding from it. Not only for students but also native or citizen require book to know the change information of year in order to year. As we know those publications have many advantages. Beside we all add our knowledge, can bring us to around the world. Through the book Eating the Sun: How Plants Power the Planet we can take more advantage. Don't one to be creative people? To be creative person must want to read a book. Merely choose the best book that appropriate with your aim. Don't possibly be doubt to change your life with that book Eating the Sun: How Plants Power the Planet. You can more inviting than now.
