Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing)

Stuart Green

Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing) Stuart Green

Computer graphics has emerged as one of the most important and appropriate uses of parallel computers and supercomputers. Green provides background information on both computer graphics and parallel computers and then goes on to describe how a distributed memory multiprocessor can be used to effectively implement the ray tracing algorithm. He emphasizes a general-purpose approach so that the techniques developed can be applied to other applications.

Ray tracing is a technique for generating realistic images that has high computational complexity, making it well suited for implementation on parallel computers. Following a description of a multiprocessor solution for ray tracing and identification of the goals of the resulting system and its key components, Green identifies the areas of difficulty in programming distributed memory multiprocessors with the intention of simplifying applications programming on these complex machines.

Contents: Introduction. Introduction to Computer Graphics. Parallel Processing and Computer Graphics. Design of a Multiprocessor Solution for Ray Tracing. Task Management. Dynamic Data Management. Static Data Management. Conclusions.

From reader reviews:

Gilbert Johnson:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each reserve has different aim or goal; it means that e-book has different type. Some people sense enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby is usually reading a book. How about the person who don't like reading a book? Sometime, person feel need book when they found difficult problem or maybe exercise. Well, probably you will want this Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing).

William Sebastian:

What do you think of book? It is just for students because they're still students or the item for all people in the world, what best subject for that? Merely you can be answered for that problem above. Every person has diverse personality and hobby for every other. Don't to be forced someone or something that they don't wish do that. You must know how great as well as important the book Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing). All type of book can you see on many resources. You can look for the internet resources or other social media.

Fannie Garcia:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you might have it in e-book approach, more simple and reachable. That Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing) can give you a lot of friends because by you investigating this one book you have point that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This publication offer you information that might be your friend doesn't recognize, by knowing more than different make you to be great men and women. So , why hesitate? We need to have Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing).

Frederick Roark:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from your book. Book is prepared or printed or highlighted from each source in which filled update of news. Within this modern era like currently, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just seeking the Parallel Processing for Computer Graphics (Research Monographs in Parallel and Distributed Computing) when you necessary it?
