# RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science)

## RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science)

RoboCup2000, the Fourth Robot World Cup Soccer Games and Conferences, was held from August 27th to September 3rd, 2000, at the Melbourne Exhibition Center in Melbourne, Australia. Like the previous international RoboCup events - RoboCup97 in Nagoya, Japan; RoboCup98 in Paris, France; and RoboCup99 in Stockholm, Sweden - RoboCup2000 included a technical workshop as well as several robotics soccer competitions. RoboCup2000 introduced the first RoboCup Jr. competition for children, as well as demonstrations of humanoid robots and of the RoboCup-Rescuedisasterrescuesimulator. This book documents RoboCup2000. It consists of (i) an overview; (ii) championship papers by the winners of the competitions; (iii) the finalist papers for the RoboCup challenge awards; (iv) the papers and posters presented at the workshop; and (v) descriptions of the teams that competed.

The book begins with an overview article introducing the competitions and demonstrations and including the scores of all of the games in the four competition leagues: the simulation league, the small-size robot (F180) league, the middle-size robot (F2000) league, and the Sony legged robot league. The following section presents the championship papers from the winners of these leagues.

The RoboCup challenge awards are distinctions that are given annually to the RoboCup-related researchers with the greatest potential to advance their respective fields.

In RoboCup2000, the challenge award finalists were selected from among the workshop papers.

The four selected finalist papers appear in the next section.

The annual RoboCup workshop provides a forum for RoboCup researchers to exchange ideas that are generally applicable across the different RoboCup leagues and/or that are of general scientific interest. The RoboCup2000 workshop received more than 60 submissions, from which 20 were selected for full presentation and an additional 20 were selected for poster presentation. These research papers form the main body of this book.

The book concludes with descriptions of most of the more than 80 teams that competed in RoboCup2000.

These team descriptions serve to catalog the

full range of researchers and approaches that have been applied to the challenges put forth by RoboCup.

The next international RoboCup events will be held in Seattle, USA (2001) and in Fukuoka, Japan (2002).

In addition to all existing RoboCup events, they are scheduled to introduce (i) RoboCup-Rescuedisasterrescue competitions for the transfer of ideas and techniques developed in the soccer domain to a related task, and (ii) a humanoid robot competition as a step toward the long-term goal of creating a full team of humanoid robots that compete on a real soccer field.

We look forward to continuing research innovations and exciting demonstrations of robotics and AI technology in these and other future RoboCup events. March 2000

Peter Stone, Tucker Balch, and Gerhard Kraetzschmar RoboCup Federation

The RoboCup Federation, the governing body of RoboCup, is an international

organization that promotes science and technology using soccer games by robots and software agents. President:

### **From reader reviews:**

#### **Josette Roscoe:**

Book is to be different for every grade. Book for children right up until adult are different content. As it is known to us that book is very important usually. The book RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science) has been making you to know about other expertise and of course you can take more information. It is quite advantages for you. The reserve RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science) is not only giving you more new information but also for being your friend when you sense bored. You can spend your current spend time to read your guide. Try to make relationship with all the book RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science). You never truly feel lose out for everything if you read some books.

#### **Ruth Williams:**

Reading a guide can be one of a lot of task that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new details. When you read a publication you will get new information mainly because book is one of various ways to share the information as well as their idea. Second, reading through a book will make you actually more imaginative. When you studying a book especially fictional book the author will bring you to definitely imagine the story how the people do it anything. Third, you could share your knowledge to other people. When you read this RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science), you can tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the others, make them reading a e-book.

#### **Chris Robins:**

This RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science) is great book for you because the content which can be full of information for you who also always deal with world and also have to make decision every minute. This kind of book reveal it data accurately using great arrange word or we can state no rambling sentences in it. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but hard core information with lovely delivering sentences. Having RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science) in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no guide that offer you world inside ten or fifteen moment right but this guide already do that. So , this is good reading book. Hello Mr. and Mrs. hectic do you still doubt this?

#### **Joseph Robison:**

You can spend your free time to read this book this publication. This RoboCup 2000: Robot Soccer World Cup IV (Lecture Notes in Computer Science) is simple to create you can read it in the area, in the beach, train in addition to soon. If you did not possess much space to bring typically the printed book, you can buy

often the e-book. It is make you better to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
