Breaking the Godspell: The Politics of Our Evolution

Neil Freer

Breaking the Godspell: The Politics of Our Evolution Neil Freer

Freer explores the archaeological, astronomical and genetic evidence for our being a half-alien, genetically engineered species. He presents the mind-boggling ramifications of this new paradigm which correct and resolve the Creationist-Evolutionary conflict, afford a generic definition of human nature, and the potential to rethink the planet. We are about to step out of racial adolescence into stellar society. Zecharia Sitchin writes, "It is gratifying that a mere decade after the publication of my work, an author with the grasp that Neil Freer displays in *Breaking the Godspell* has set out to probe what the recognition of the existence and Earth-visits of the Nefilim can mean -- not just to scientists and theologians -- but to each human being upon this planet Earth."
