The Creation of Wealth and Poverty: Means and Ways (Routledge Frontiers of Political Economy)

Hassan Bougrine

There is a failure of governments to provide the citizens of developing countries with the necessary ingredients for growth and development. This can only be explained by their inability to secure the sources of financing which ultimately allow them to "command" these ingredients.

The Creation of Wealth and Poverty is a study of the means and ways by which wealth and poverty are created in both developed and developing countries. It puts a particular emphasis on the role played by economic policy in shaping the stratification of modern societies through specific programmes dealing with issues of job creation, poverty and environmental degradation. This book is concerned with the social effects of the ongoing crisis in finance, development and the environment. By focusing on the political, legal and financial institutions that govern society and the economy, the book provides an analysis of wealth and poverty from a historical perspective. It shows how economic and social policies of the neoliberal model have led to a rise in unemployment, poverty and inequality and, therefore, made societies more polarized.

This volume will be of great interest to policymakers, academics and students who study political economy, development economics and macroeconomics.
