I started this book with a simple design using only curved lines, the next with only right angles, and finally acute and obtuse angles. Combining slight variations of these different line elements I created puzzle like shapes. I keep the line elements consistently inconsistent within the design but always have a common theme to tie them together. All of the images in this book are designed so the lines at the edges of each page connect with the corresponding lines for every page side to side and top to bottom.
