Design and Analysis: A Researcher's Handbook (4th Edition)

Geoffrey Keppel Professor Emeritus, Thomas D. Wickens

Design and Analysis: A Researcher's Handbook (4th Edition) Geoffrey Keppel Professor Emeritus, Thomas D. Wickens

The fourth edition of *Design and Analysis* continues to offer a readily accessible introduction to the designed experiment in research and the statistical analysis of the data from such experiments. Unique because it emphasizes the use of analytical procedures, this book is appropriate for all as it requires knowledge of only the most fundamental mathematical skills and little or no formal statistical background. Topics include: single- and two-factor designs with independent groups of subjects; corresponding designs with multiple observations; analysis of designs with unequal sample sizes; analysis of covariance; designs with three factors, including all combinations of between-subjects and within-subject factors; random factors and statistical generalization; and nested factors. This book lives up to its name as a handbook, because of its usefulness as a source and guide to researchers who require assistance in both planning a study and analyzing its results.
