Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing)

David Gelernter, Alexandru Nicolau, David Padua

Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing) David Gelernter, Alexandru Nicolau, David Padua

These contributions provide a timely overview of research being done in universities and industry on state-of-the-art programming languages and compilers for parallel computers.

The topics covered include languages and language extensions for parallel computing—a status report on CONSUL, a future-based parallel language for a general-purpose high-parallel computer; COOL, blackboard programming in shared Prolog, refined C, the XYZ abstraction levels of pokerlike languages, and the PARSEQ project. There are chapters on interactive/graphical environments that extend or complement traditional programming languages, on fundamental parallelization techniques and parallelization systems, on techniques for the automatic extraction of fine-grain parallelism, and on parallelization techniques targeted at shared-memory parallel processors, distributed memory parallel processors, and dataflow computers.

Tools for parallel programming, debugging, and performance enhancement are investigated, and work being done on the parallelization of C and Lisp reported. In the area of compilation and restructuring of parallel programs, there are chapters on the translation of C-Linda, machine code optimization for the Cray computer, and techniques for the further parallelization of parallel programs.

From reader reviews:

Robert Mundo:

Book is written, printed, or highlighted for everything. You can learn everything you want by a publication. Book has a different type. As we know that book is important issue to bring us around the world. Beside that you can your reading expertise was fluently. A reserve Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing) will make you to end up being smarter. You can feel more confidence if you can know about everything. But some of you think which open or reading some sort of book make you bored. It is far from make you fun. Why they are often thought like that? Have you looking for best book or ideal book with you?

Johnna Chapin:

Hey guys, do you wishes to finds a new book to see? May be the book with the subject Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing) suitable to you? Often the book was written by renowned writer in this era. The actual book untitled Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing)is one of several books in which everyone read now. That book was inspired a number of people in the world. When you read this book you will enter the new way of measuring that you ever know before. The author explained their strategy in the simple way, therefore all of people can easily to know the core of this reserve. This book will give you a large amount of information about this world now. So that you can see the represented of the world with this book.

Maria Lamotte:

Reading can called mind hangout, why? Because when you are reading a book especially book entitled Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing) your mind will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely will become your mind friends. Imaging each and every word written in a guide then become one application form conclusion and explanation this maybe you never get ahead of. The Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing) giving you a different experience more than blown away your brain but also giving you useful info for your better life in this era. So now let us show you the relaxing pattern the following is your body and mind will likely be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Sue Eldred:

Are you kind of occupied person, only have 10 or maybe 15 minute in your day time to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are having problem with the book when

compared with can satisfy your short period of time to read it because this time you only find e-book that need more time to be learn. Languages and Compilers for Parallel Computing (Research Monographs in Parallel and Distributed Computing) can be your answer because it can be read by anyone who have those short extra time problems.
