Research Methods in Health Promotion

Laura F. Salazar, Richard A. Crosby, Ralph J. DiClemente

Research Methods in Health Promotion Laura F. Salazar, Richard A. Crosby, Ralph J. DiClemente
The bestselling textbook to understanding health research, updated and expanded

Research Methods in Health Promotion provides students and practitioners with essential knowledge and skills regarding the design, implementation, analysis, and interpretation of research in the field of health promotion. Now in its second edition, this bestselling textbook has been updated with more recent research methodologies and additional information on sampling, participatory and survey research, and qualitative data analysis. The entire research process is covered, with specific points relating to both qualitative and quantitative research. By breaking the daunting process of research into simple and well-defined steps, this user-friendly text encourages students to think about research as a sequential process and provides explanations that facilitate better understanding of each step in the research process. A separate set of chapters cover the more quantitative methodological areas including designs, measurement, sampling, and data analysis in depth, giving readers the understanding they need to apply in practice.

This book also provides applied chapters that illustrate the practical aspects of the research process, along with other critical information including grant writing and scientific writing.

- Evaluate the ethics, design, analysis, and interpretation of research
- Identify and understand the key components of research studies
- Analyze and interpret the results of experimental and survey research designs
- Understand the process of publishing a research report and constructing a grant proposal

Research Methods in Health Promotion is ideal for both undergrad and graduate methods courses in health promotion and public health.

From reader reviews:

Gary Lewis:

What do you concentrate on book? It is just for students because they are still students or it for all people in the world, the actual best subject for that? Merely you can be answered for that issue above. Every person has different personality and hobby per other. Don't to be pressured someone or something that they don't would like do that. You must know how great and important the book Research Methods in Health Promotion. All type of book are you able to see on many solutions. You can look for the internet sources or other social media.

Monte Lawson:

This Research Methods in Health Promotion usually are reliable for you who want to certainly be a successful person, why. The key reason why of this Research Methods in Health Promotion can be one of the great books you must have is usually giving you more than just simple examining food but feed anyone with information that probably will shock your preceding knowledge. This book is usually handy, you can bring it all over the place and whenever your conditions both in e-book and printed ones. Beside that this Research Methods in Health Promotion forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we realize it useful in your day action. So , let's have it appreciate reading.

Julian Loreda:

Spent a free time to be fun activity to perform! A lot of people spent their spare time with their family, or all their friends. Usually they performing activity like watching television, gonna beach, or picnic inside the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the e-book untitled Research Methods in Health Promotion can be good book to read. May be it may be best activity to you.

Kevin Masterson:

Playing with family in a park, coming to see the coastal world or hanging out with buddies is thing that usually you will have done when you have spare time, in that case why you don't try thing that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Research Methods in Health Promotion, you may enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is it? Oh come on its mind hangout fellas. What? Still don't understand it, oh come on its known as reading friends.
