Infrared Non-local Modifications of General Relativity (Springer Theses) Ermis Mitsou

This thesis presents significant new results on the problem of understanding the origin of dark energy in cosmology. The work develops an original approach based on modifications of General Relativity at cosmological scales, introducing non-local effective terms that can in principle emerge from fundamental local theories. Both the phenomenological consequences and theoretical aspects of the proposal are developed in depth. The thesis also contains significant new material compared to that published by the author in scientific journals.

From reader reviews:

Anderson Austin:

Book is to be different for each and every grade. Book for children till adult are different content. As you may know that book is very important for all of us. The book Infrared Non-local Modifications of General Relativity (Springer Theses) had been making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The reserve Infrared Non-local Modifications of General Relativity (Springer Theses) is not only giving you much more new information but also to become your friend when you really feel bored. You can spend your personal spend time to read your publication. Try to make relationship with all the book Infrared Non-local Modifications of General Relativity (Springer Theses). You never really feel lose out for everything when you read some books.

Sharyl Nettles:

Now a day people that Living in the era exactly where everything reachable by connect to the internet and the resources included can be true or not need people to be aware of each details they get. How individuals to be smart in receiving any information nowadays? Of course the reply is reading a book. Reading a book can help persons out of this uncertainty Information specially this Infrared Non-local Modifications of General Relativity (Springer Theses) book because book offers you rich info and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you know.

William Hughes:

Does one one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you just dont know the inside because don't judge book by its include may doesn't work this is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer could be Infrared Non-local Modifications of General Relativity (Springer Theses) why because the fantastic cover that make you consider concerning the content will not disappoint a person. The inside or content will be fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

Lionel Gutierrez:

What is your hobby? Have you heard this question when you got pupils? We believe that that question was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person such as reading or as reading become their hobby. You need to understand that reading is very important along with book as to be the point. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You will find good news or update concerning something by book. Numerous books that can you decide to try be your object. One of them is this Infrared Non-local Modifications of General Relativity (Springer Theses).
