Well-Architected Fluoropolymers: Synthesis, Properties and Applications

Bruno Ameduri, Bernard Boutevin

Well-Architected Fluoropolymers: Synthesis, Properties and Applications Bruno Ameduri, Bernard Boutevin

Because of the increasing need for ever better performing materials endowed with specific properties, macromolecular engineering has become a useful tool for designing well-architected polymers (telomers, telechelics, stars, dendrimers, alternating, block- and graftcopolymers). These polymers are nowadays seeing an enormous growth. Among them, fluoropolymers are seen as high value added materials in many applications ranging from surfactants, optical fibers, biomaterials, coatings, to membranes for fuel cells. Indeed, the relationship between structure of the monomer to the properties of the polymers is of increasing interest so that these properties are tuned for the most appropriate applications. As most fluoropolymers are prepared from radical synthesis, this book devotes various parts on the use of the controlled radical (or pseudo-living) polymerisation of fluoromonomers leading to discoveries of thermoplastic elastomers or original surfactants for polymerisation in supercritical CO₂.

Well-Architected Fluoropolymers: Synthesis, Properties and Applications, is composed of five chapters starting with a general introduction outlining basic concepts. Emphasis is placed on recent developments, and each chapter describes comprehensive techniques of synthesis of well-defined fluorotelomers or polymers, their properties, characterisations, and their applications, for immediate use by today's engineers, industrial and academic scientists, and researchers.

The book has been arranged to enable self-managed reading and learning. It is both a source of data and a reference.

- On the synthesis, properties and applications of fluoropolymers: remarkable, high value added materials applied in surfactants, optical fibres, biomaterials, coatings and membranes for fuel cells.
- For immediate use by today's engineers, industrial and academic scientists, and researchers
- Written to enable self-managed reading and learning, being both a source of data and a reference.

From reader reviews:

Steven Williams:

People live in this new time of lifestyle always aim to and must have the extra time or they will get great deal of stress from both way of life and work. So , if we ask do people have time, we will say absolutely without a doubt. People is human not just a robot. Then we question again, what kind of activity do you possess when the spare time coming to you of course your answer may unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, the book you have read is actually Well-Architected Fluoropolymers: Synthesis, Properties and Applications.

Laura Hill:

The book untitled Well-Architected Fluoropolymers: Synthesis, Properties and Applications contain a lot of information on this. The writer explains your girlfriend idea with easy technique. The language is very clear and understandable all the people, so do not worry, you can easy to read the idea. The book was compiled by famous author. The author provides you in the new time of literary works. You can actually read this book because you can read on your smart phone, or product, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official website along with order it. Have a nice read.

Thomas Schroeder:

Many people spending their moment by playing outside having friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by reading a book. Ugh, you think reading a book can actually hard because you have to accept the book everywhere? It okay you can have the e-book, taking everywhere you want in your Smartphone. Like Well-Architected Fluoropolymers: Synthesis, Properties and Applications which is keeping the e-book version. So , try out this book? Let's see.

Joseph Langley:

Don't be worry should you be afraid that this book can filled the space in your house, you may have it in e-book technique, more simple and reachable. That Well-Architected Fluoropolymers: Synthesis, Properties and Applications can give you a lot of buddies because by you looking at this one book you have point that they don't and make a person more like an interesting person. That book can be one of one step for you to get success. This e-book offer you information that probably your friend doesn't know, by knowing more than additional make you to be great folks. So , why hesitate? We need to have Well-Architected Fluoropolymers: Synthesis, Properties and Applications.
