Ingenious Mathematical Problems and Methods (Dover Books on Mathematics)

Louis A. Graham

Ingenious Mathematical Problems and Methods (Dover Books on Mathematics) Louis A. Graham

For two decades, an international readership of workers in applied mathematics submitted their favorite puzzles to a mid-twentieth-century column, *The Graham Dial*. This original collection features 100 of the publication's very best problems, with themes ranging from logic and engineering situations to number theory and geometry. Each problem was specifically selected for its widely differing modes of solution, and most include several methods of solution plus assessments of their efficacy.

In checking their solutions against the book's, readers may find that their interest in the puzzles increases. The search for an answer can develop into a challenge to improve upon existing solutions, as in a friendly competition among dozens of keen-witted, problem-solving engineers and mathematical puzzle fans. More than two dozen "mathematical nursery rhymes" appear throughout the book, which concludes with a final section of 25 "quickies" that will test readers' speed.

From reader reviews:

Mary Barnett:

Reading a book can be one of a lot of exercise that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a book you will get new information because book is one of various ways to share the information or perhaps their idea. Second, studying a book will make a person more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the figures do it anything. Third, you can share your knowledge to other folks. When you read this Ingenious Mathematical Problems and Methods (Dover Books on Mathematics), you are able to tells your family, friends along with soon about yours guide. Your knowledge can inspire the mediocre, make them reading a book.

James Thrasher:

People live in this new moment of lifestyle always attempt to and must have the free time or they will get lot of stress from both everyday life and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not just a robot. Then we consult again, what kind of activity do you have when the spare time coming to you of course your answer may unlimited right. Then do you try this one, reading books. It can be your alternative throughout spending your spare time, the book you have read will be Ingenious Mathematical Problems and Methods (Dover Books on Mathematics).

Earl Wright:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your time to upgrading your mind proficiency or thinking skill actually analytical thinking? Then you are having problem with the book than can satisfy your small amount of time to read it because pretty much everything time you only find publication that need more time to be read. Ingenious Mathematical Problems and Methods (Dover Books on Mathematics) can be your answer mainly because it can be read by you actually who have those short time problems.

Darrel Mason:

That publication can make you to feel relax. This kind of book Ingenious Mathematical Problems and Methods (Dover Books on Mathematics) was colorful and of course has pictures around. As we know that book Ingenious Mathematical Problems and Methods (Dover Books on Mathematics) has many kinds or type. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading this.
