Gary R. Jensen, Emilio Musso, Lorenzo Nicolodi

Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext) Gary R. Jensen, Emilio Musso, Lorenzo Nicolodi

Designed for intermediate graduate studies, this text will broaden students' core knowledge of differential geometry providing foundational material to relevant topics in classical differential geometry. The method of moving frames, a natural means for discovering and proving important results, provides the basis of treatment for topics discussed. Its application in many areas helps to connect the various geometries and to uncover many deep relationships, such as the Lawson correspondence. The nearly 300 problems and exercises range from simple applications to open problems. Exercises are embedded in the text as essential parts of the exposition. Problems are collected at the end of each chapter; solutions to select problems are given at the end of the book. *Mathematica*®, *Matlab*™, and *Xfig* are used to illustrate selected concepts and results. The careful selection of results serves to show the reader how to prove the most important theorems in the subject, which may become the foundation of future progress.

The book pursues significant results beyond the standard topics of an introductory differential geometry course. A sample of these results includes the Willmore functional, the classification of cyclides of Dupin, the Bonnet problem, constant mean curvature immersions, isothermic immersions, and the duality between minimal surfaces in Euclidean space and constant mean curvature surfaces in hyperbolic space. The book concludes with Lie sphere geometry and its spectacular result that all cyclides of Dupin are Lie sphere equivalent. The exposition is restricted to curves and surfaces in order to emphasize the geometric interpretation of invariants and other constructions. Working in low dimensions helps students develop a strong geometric intuition. Aspiring geometers will acquire a working knowledge of curves and surfaces in classical geometries. Students will learn the invariants of conformal geometry and how these relate to the invariants of Euclidean, spherical, and hyperbolic geometry. They will learn the fundamentals of Lie sphere geometry, which require the notion of Legendre immersions of a contact structure. Prerequisites include a completed one semester standard course on manifold theory.

From reader reviews:

Suzanne Jensen:

What do you think of book? It is just for students as they are still students or the idea for all people in the world, what the best subject for that? Simply you can be answered for that concern above. Every person has distinct personality and hobby per other. Don't to be forced someone or something that they don't would like do that. You must know how great as well as important the book Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext). All type of book are you able to see on many sources. You can look for the internet options or other social media.

Betty Abbott:

Often the book Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext) will bring that you the new experience of reading a new book. The author style to elucidate the idea is very unique. In the event you try to find new book you just read, this book very appropriate to you. The book Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext) is much recommended to you you just read. You can also get the e-book in the official web site, so you can more readily to read the book.

Leif Gibbs:

This Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext) is new way for you who has interest to look for some information given it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know otherwise you who still having little bit of digest in reading this Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext) can be the light food for you personally because the information inside this book is easy to get by means of anyone. These books acquire itself in the form which is reachable by anyone, sure I mean in the e-book form. People who think that in book form make them feel drowsy even dizzy this book is the answer. So there is no in reading a reserve especially this one. You can find what you are looking for. It should be here for a person. So , don't miss this! Just read this e-book style for your better life as well as knowledge.

Faye Berg:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from your book. Book is prepared or printed or descriptive from each source in which filled update of news. In this modern era like currently, many ways to get information are available for anyone. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Surfaces in Classical Geometries: A Treatment by Moving Frames (Universitext) when you desired it?
